

How to find out if a file exists in C# / .NET?

```
var filepathToSearchFile = @"\News_Images";
bool fileExist =
Directory.EnumerateFiles(filepathToSearchFile, postedFile.FileName).Any();
if (fileExist)
{
    throw new Exception();
}

Else{
    Save The File
}
```

File Path
where to
search The File

File Name
