AngularJS : Factory and Service?

```javascript
app.service('myService', function() {

  // service is just a constructor function
  // that will be called with 'new'

  this.sayHello = function(name) {
     return "Hi " + name + "!";
  };
});

app.factory('myFactory', function() {

  // factory returns an object
  // you can run some code before

  return {
    sayHello : function(name) {
      return "Hi " + name + "!";
    }
  }
});
```

AngularJS .service

```javascript
module.service('MyService', function() {

    this.method1 = function() {
          //..method1 logic
       }

    this.method2 = function() {
          //..method2 logic
       }
});
```

AngularJS .factory

```javascript
module.factory('MyFactory', function() {

    var factory = {};

    factory.method1 = function() {
          //..method1 logic
       }

    factory.method2 = function() {
          //..method2 logic
       }

    return factory;
});
```
